This statement is declared to be nonsensical, because, it is pointed out, a vessel leaving Liverpool is at once in the danger zone. Some despatches were received from him, but they were not made public because, it was understood, the department was unwilling to give out material which it considered incomplete

CAPTAIN OF ARABIC SURE SHE WAS TORPEDOED

There is not the slightest doubt that it was fired at the Arabic de-liberately. It is quite true that we never saw any submarine or any per-iscope; but I saw thte white streak made by the passage of the torpedo through the water—a white streak that commneced with air bubbles in the water 3,00 yards from us at the ause of that white streak, which ended in a torpedo entering the ship and causing the explosion which sank the vessel. I was not alone in seeing it. The chief officer, the second officer and many passengers saw it. No one can doubt for a moment that it was deliberately fired at the Arabic. Those aboard the submarine evidently gaw us and got into position ready to re-lease their torpedo.

"The fact that nobody on the Arabic saw a submarine may be easily ex-plained. Those in command of it could submerge and leave only a small portion of the periscope showing above the water. When the missile

to Uphold Cotton Market in the Fac of Commodity Being Listed as Con traband by Allies.

Washington, Aug. 23.—Treasury of-ficials tonight made public an an-nouncement by Secretary McAdoo that, in view of the action of the allies in putting cotton on the contraband lis he would, if it became necessary, de-posit \$30,000,000 or more in gold in the federal reserve banks at Atlanta, Dal-las and Richmond for the purpose of enabling the reserve banks to rediscount loans on cotton secured by ware-house receipts made by national banks and state banks belonging to the federal reserve system.

Temporarily Without Interest. The gold woud be deposited temporarily, at least, without interest charge. It was explained that if it appeare that the object could be accomplished with greater efficiency, thereby, the deposits would be made directly with national banks agreeing to lend the money on cotton at a rate not to ex-ceed six percent?

To Uphold Cotton Market, Secretary McAdoo authorized the anuncement from his summer home at North Haven, Maine. It came at the close of a day of speculation in official circles as to the nature of steps which the entente powers have indicated they will take to upheld the cotton market in the face of their contraband order.

Justified by Unusual Situation. "In the exercise of the discretion given to him by law", read the treasury statement, "Secretary McAdoo said that the government will for the time being charge no interest on these de-posits in federal reserve banks; that such is justified by the unusual situation respecting cotton caused by the European war; that he considers it his duty to use every available means in his power to help the cotton pro-ducer of the south in the circumstances that it is a matter of economic im portance to the entire nation that those who have produced the cotton crop shall have a fair oportunity to dispose of it gradually and in an or-derly manner so they may not be forced, through inability to market their catton gradually, to sell it at sacrifice prices.

Carry Cotton Until Marketed. "The secretary said that one of his chief objects was to create a basis for such enlarged credit in the south that the banks will have ample resources to extend to producers such accommodations that they will be able to carry cotton in warehouses for a reasonable length of time until it can reasonable length of time un be marketed advantageously. to accomplish this, he said, the state and national banks which make loans on warehouse receipts for insured cotton at low rates of interest; that the banks can well afford to carry cotton for producers at six percent es-pecially if they are able to re-discount cotton paper at the federal re-serve banks at a much lower rate than six percent; that the credit resources of the banks of the country are greater than ever before in our history and that there is no reason why the banks a gold medal to Mrs. W. K. Vander-merchants of the south, help the cotin the present peculiar situation.

May Deposit in Other Bank. "Mr. McAdoo said, however, that should it apear that the object in view could be accomplished with greater efficiency to the cotton proicers, the merchants and the banks of the south by depositing government funds in the national banks direct instead of in the federal reserve banks, he would take that course and make deposits in such national banks as would give him the assurance that the money so deposited or the credit based thereon would be loaned on cotton insured or warehoused and at a rate of interest not to exceed six percent. "The secretary declared he believed that there was no occasion for alarm about the future of cotton.

COTTON AS CONTRABAND for That Purpose.

Washington, Aug. 23.—The new American note to Great Britain on interference with neutral trade pr tish order making cotton contraband.

The note has been virtually completed. It now will be altered and probably will treat at length the ques-tion of the validity under interna-tional law of Great Britain's last action. The new American note, it is un-derstood, will lodge formal protest against the placing of cotton on the contraband list and a lengthy diplomatic exchange probably will follow. It is considered likely by some officials here that the dispute eventually will be settled by arbitration.
